

Compro-Competence profiles in elderly care

The EU-project "Compro" is co-ordinated by the Paritätische Akademie and started in October 2006. In cooperation with 19 partners and institutions from five EU-countries the project aims at developing a competence profile for representatives for human resources management who will be sensitized to personnel development, organisations' development and training on the job.

Univation is supporting the project by evaluating a transnational conference and carrying out a coaching related to evaluation.
