

## **mitWirkung! - An initiative for youth involvement**

The Bertelsmann foundation started this initiative to create opportunities for the involvement of children and teenagers, to give them possibilities to co-decide in the definition of our future society and participate in social controversies.

The evaluation is carried out as a mix of internal and external evaluation and also includes parts of self-evaluation. The aims of the evaluation on the one hand are optimization of developed concepts and processes, on the other hand critical and constructive reporting.
